Sir:

A personal interview was conducted on June 16, 2005 between Applicants' representative and Examiner J. Gonzalez at the U.S. Patent and Trademark Office.

During the interview, it was pointed out to the Examiner that the storage element disclosed in claims 1 and 11 is shown in the figures, as the battery 9, as described in the specification. The claims, as amended in the June 14, 2005 Amendment, were reviewed in light of the applied references to Nowakowski and Liu. The Examiner indicated that the although the revised claims appear to overcome the applied references, a more

detailed analysis would be needed and an additional search would be conducted in light of the amendments.

Respectfully submitted,
